

# GeneMark Prediction Report

## General Statistics

Gene count: 28666

Single-exon genes: 5514

Multi-exon genes: 23152

Introns per gene: 4.25

Introns per multi-exon gene: 5.26

Genes fully supported by external evidence: 19988 (69.73%)

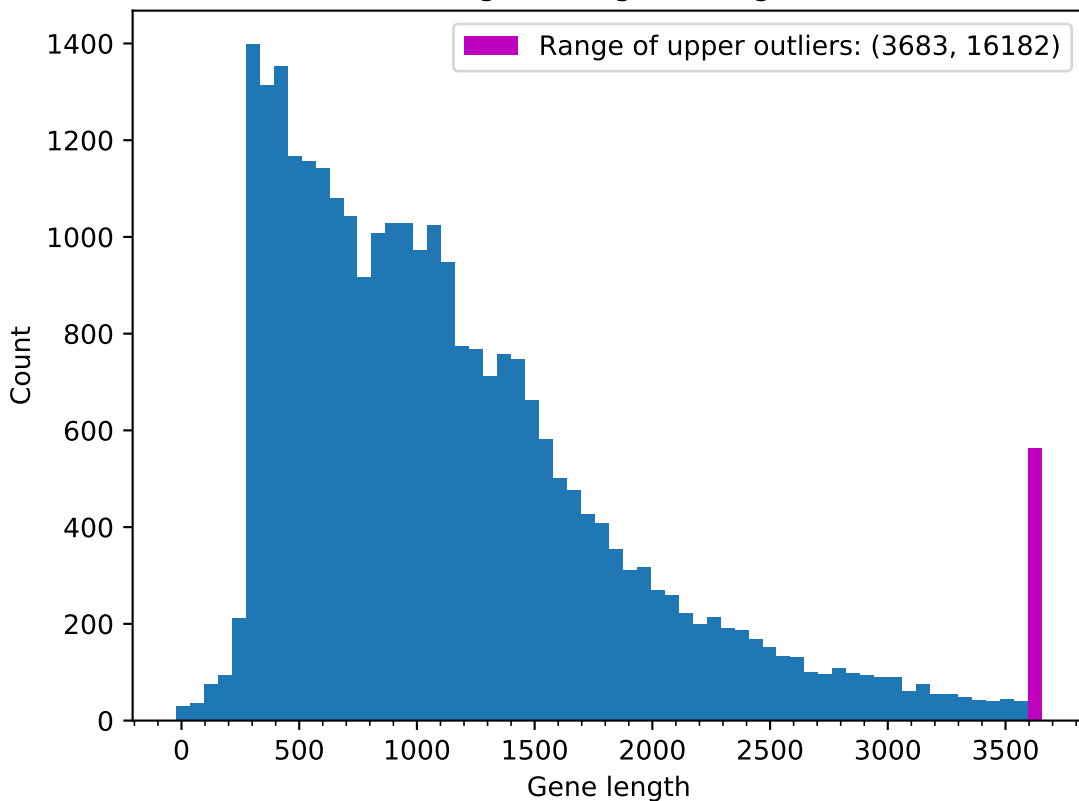

Genes partially supported by external evidence: 25599 (89.3%)

Genes unsupported by any external evidence: 3067 (10.7%)

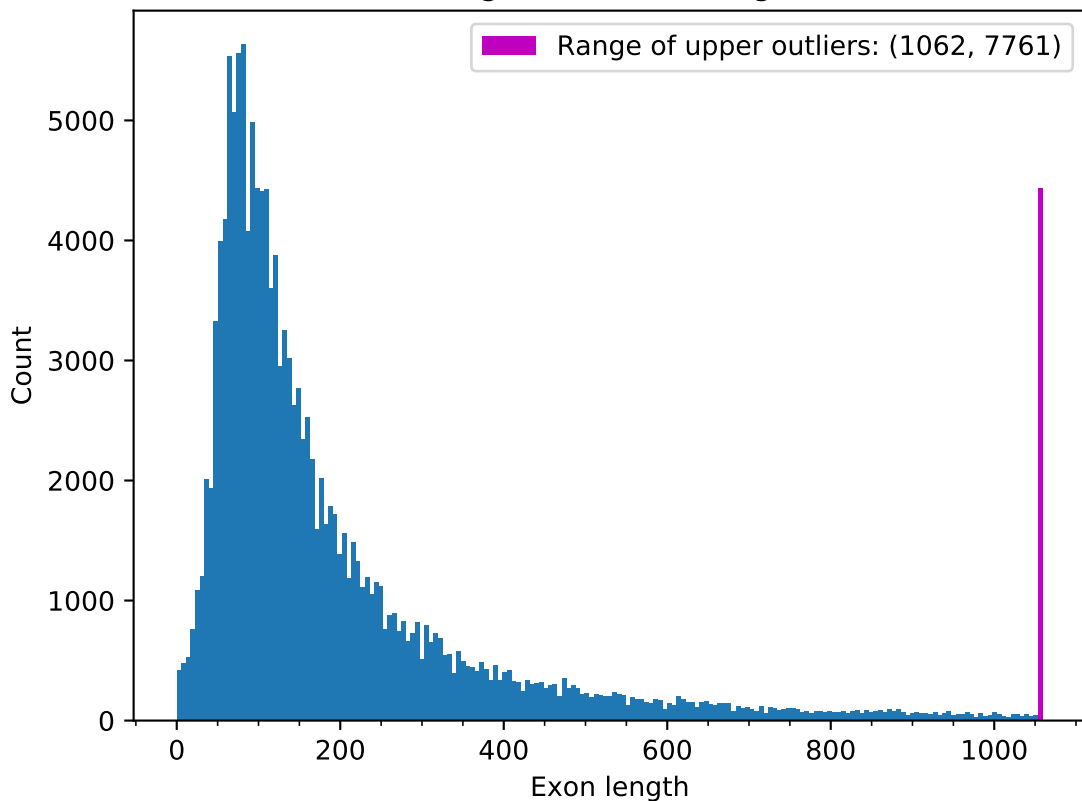

Complete genes: 28385 (99.02%)

Partial genes: 281 (0.98%)

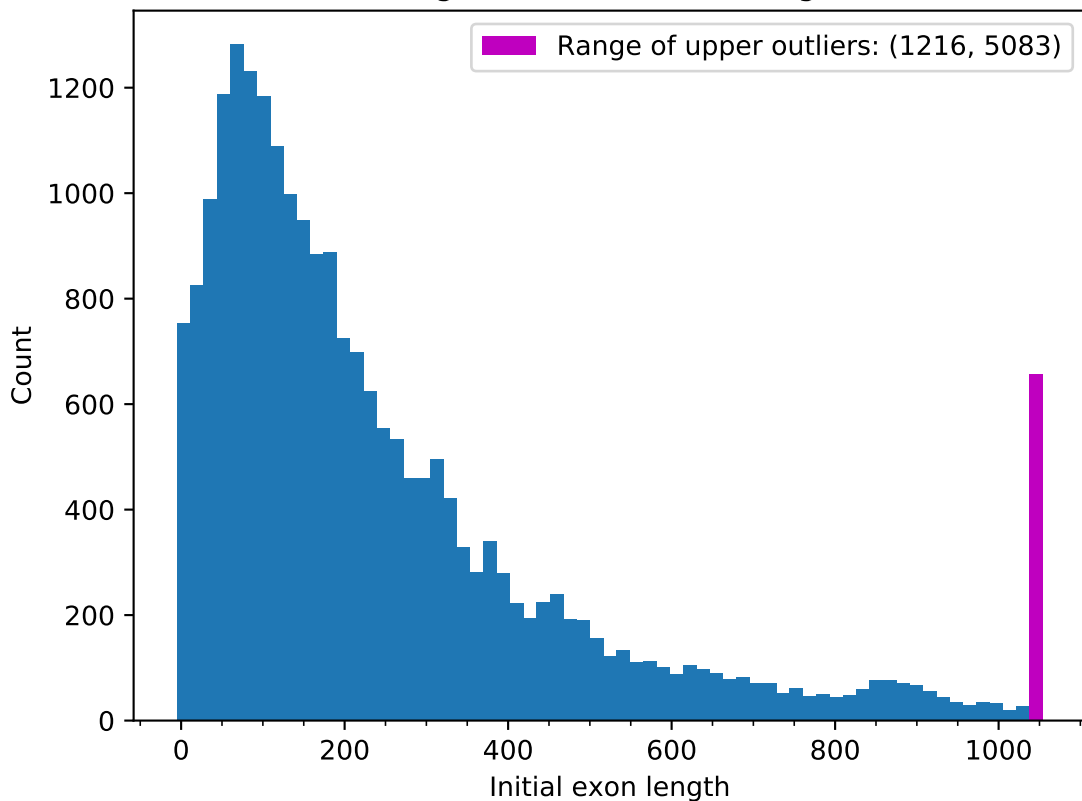

Histogram of gene lengths

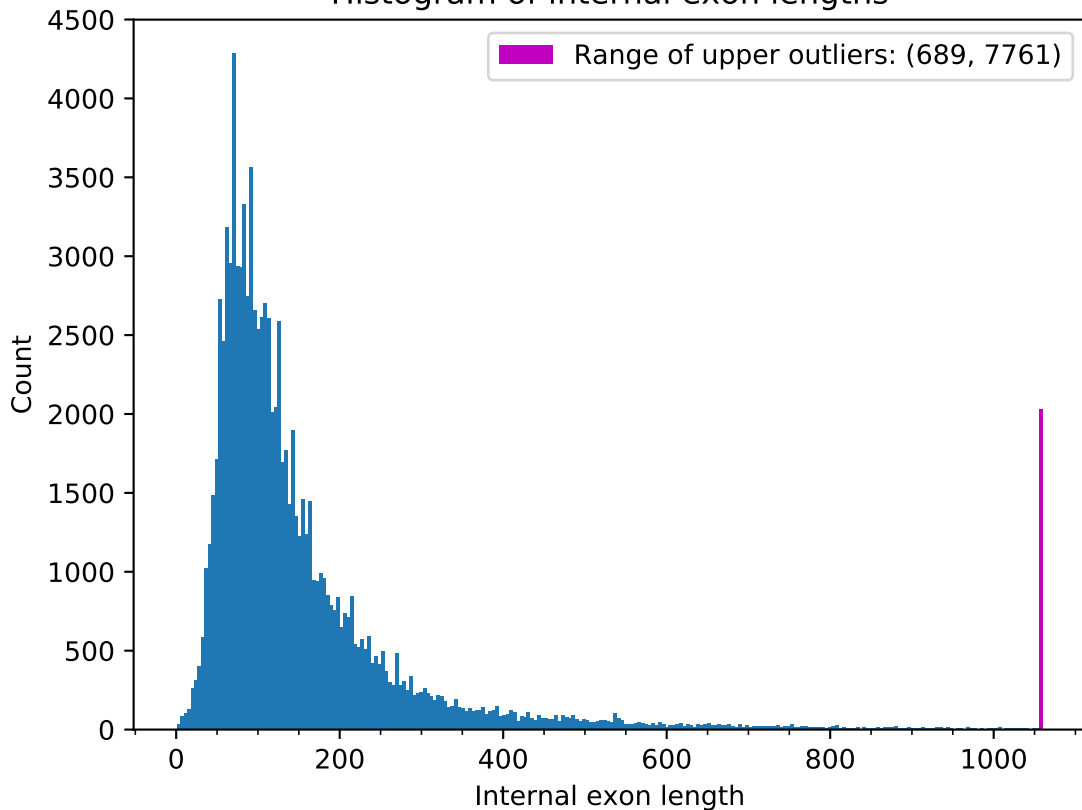

Histogram of exon lengths

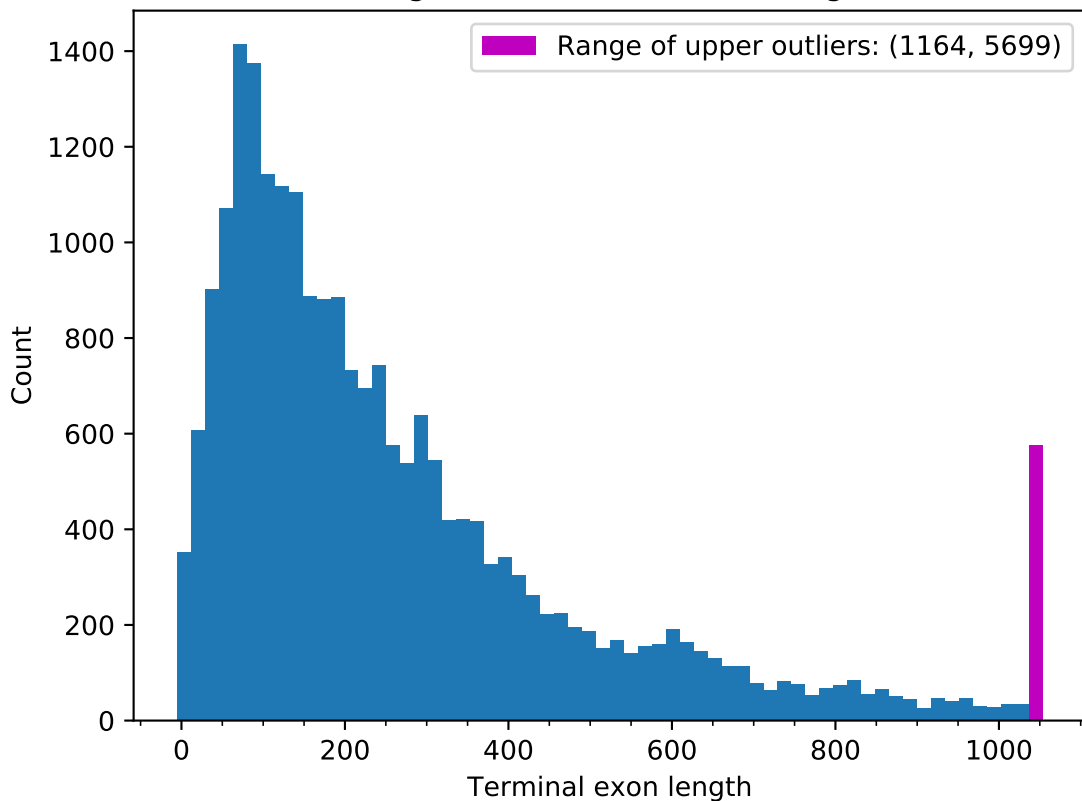

Histogram of initial exon lengths

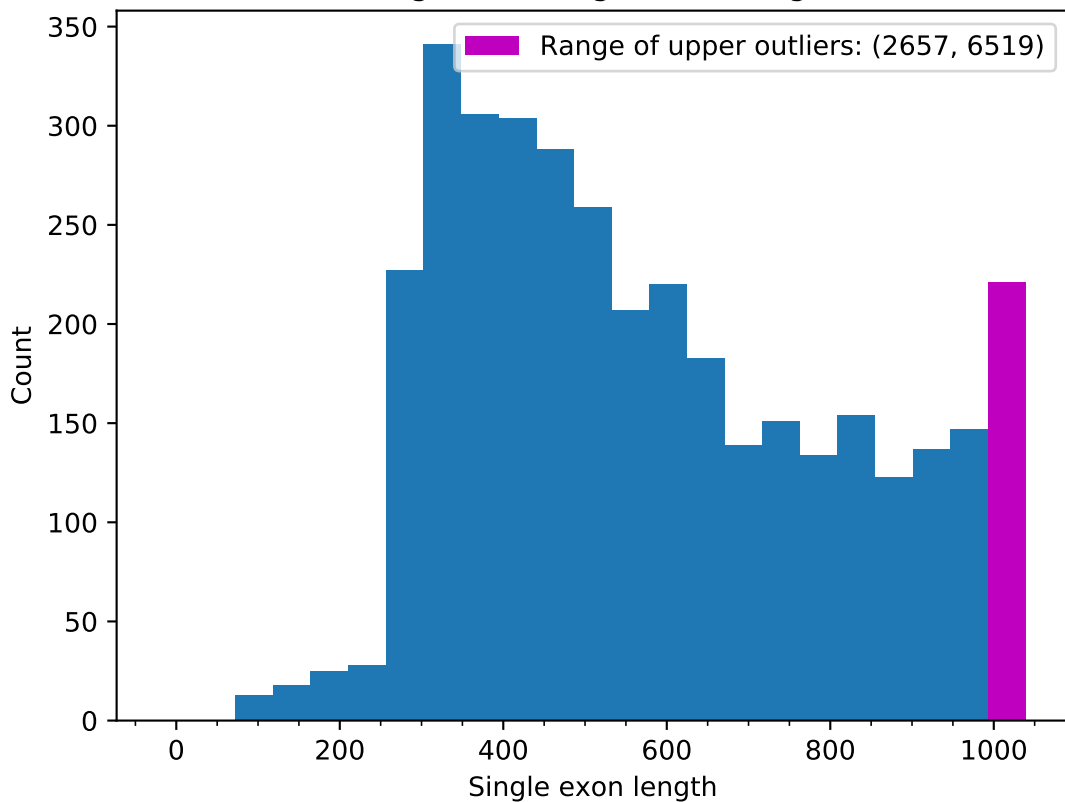

Histogram of internal exon lengths

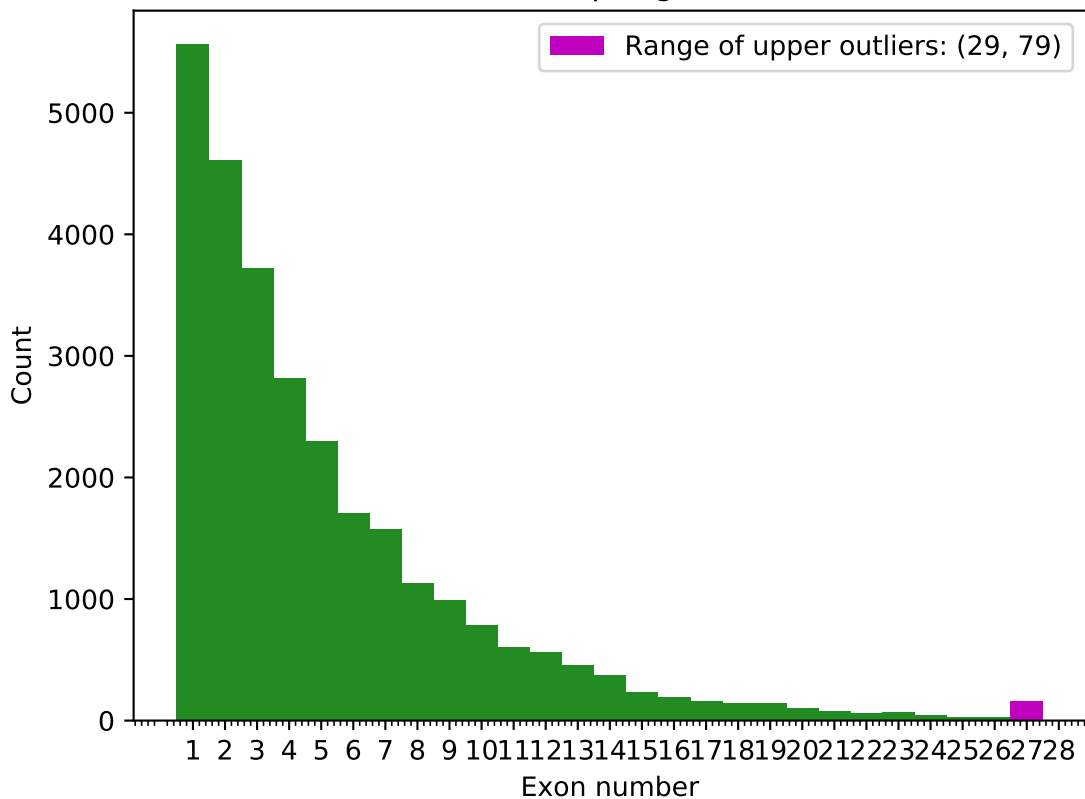

Histogram of terminal exon lengths

Histogram of single exon lengths

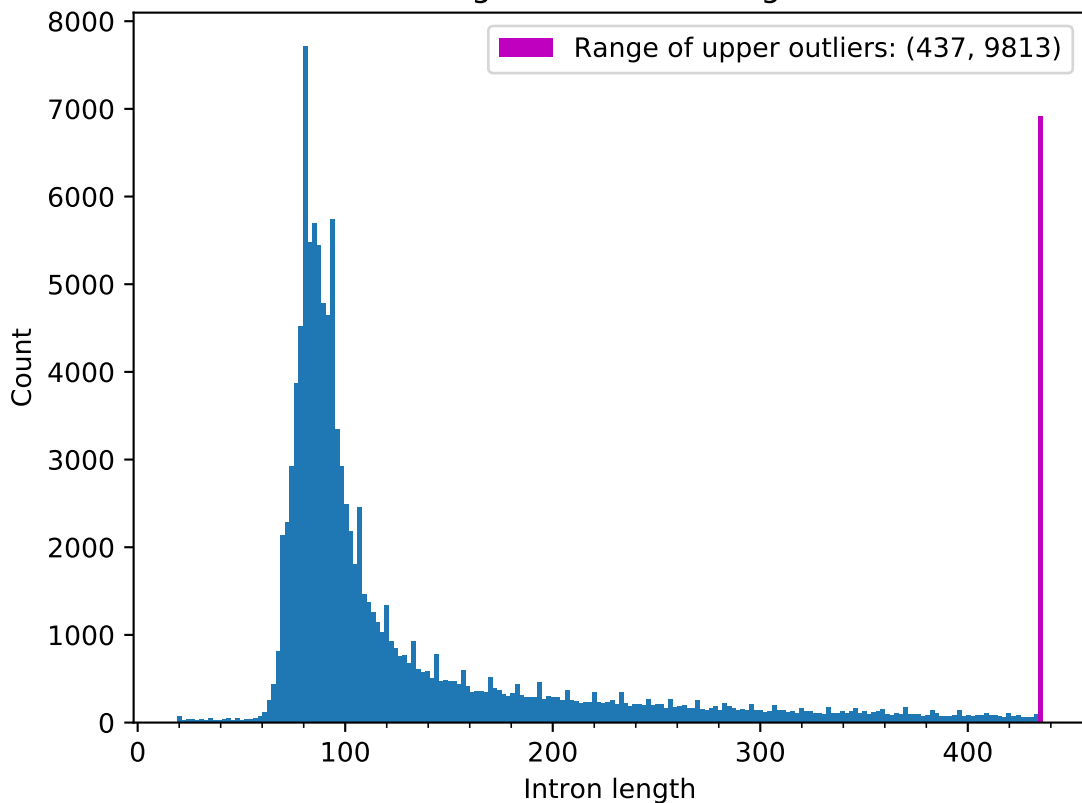

## Exons per gene

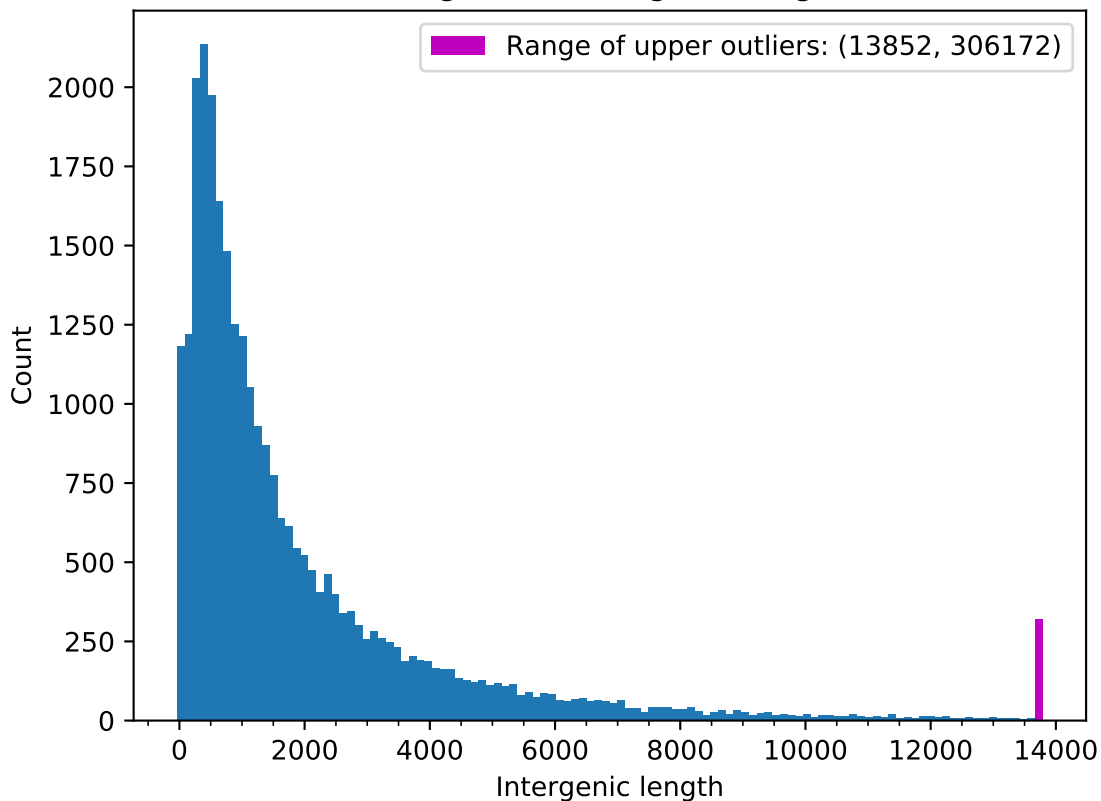

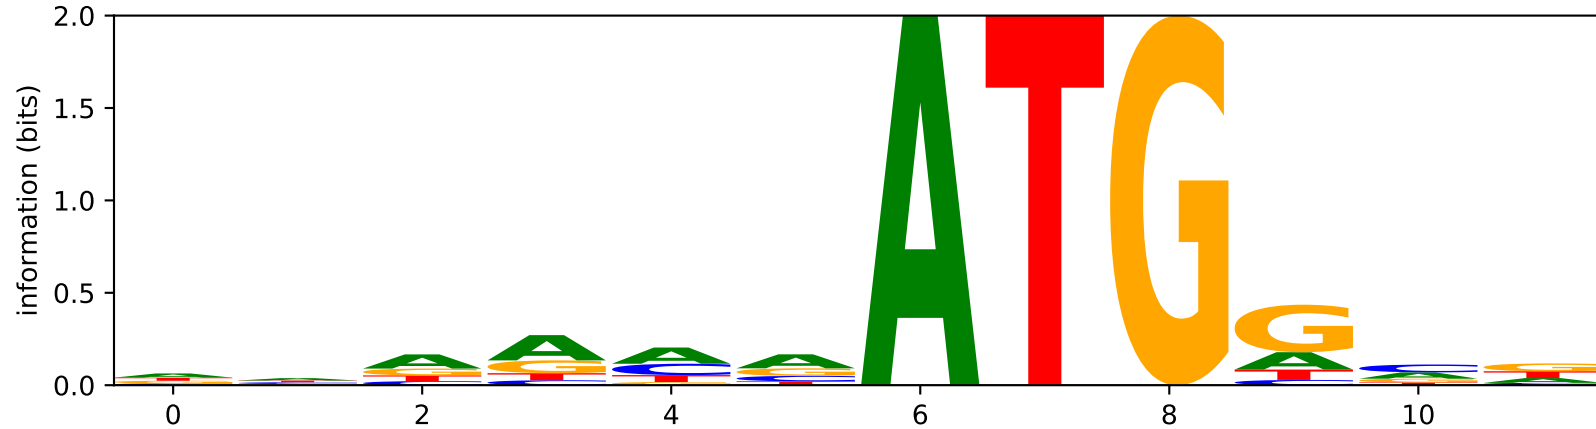

Histogram of intron lengths

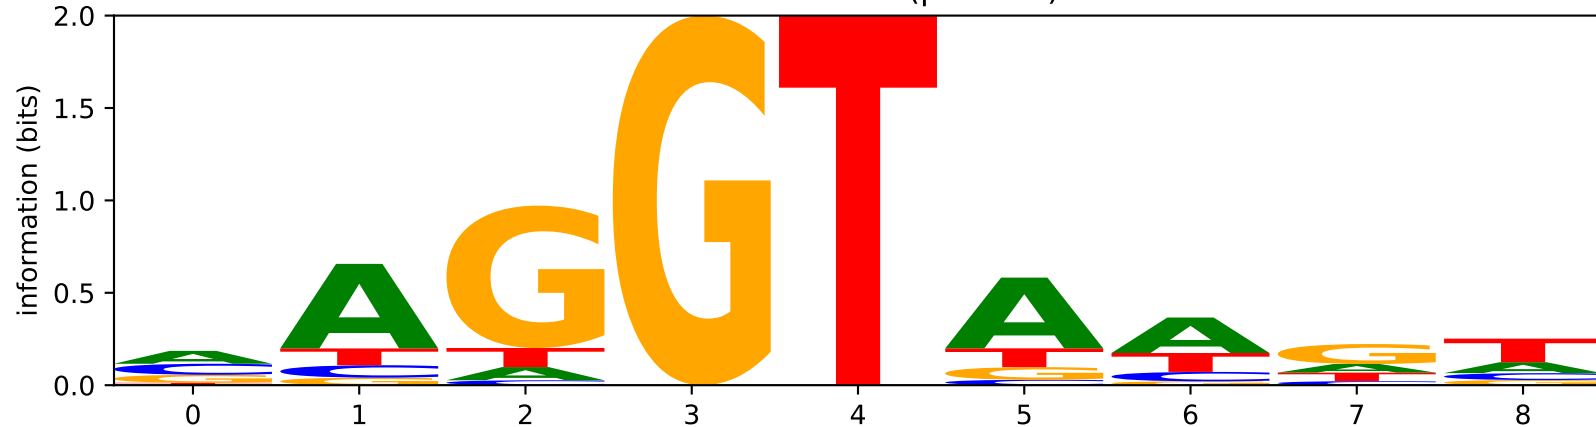

Histogram of intergenic lengths

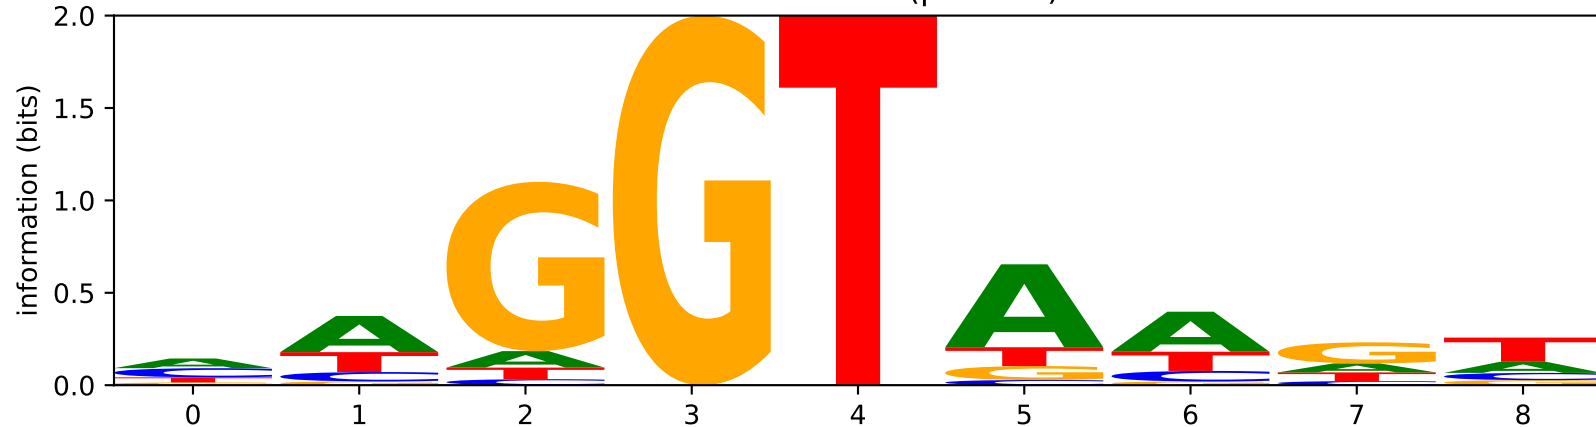

Start motif

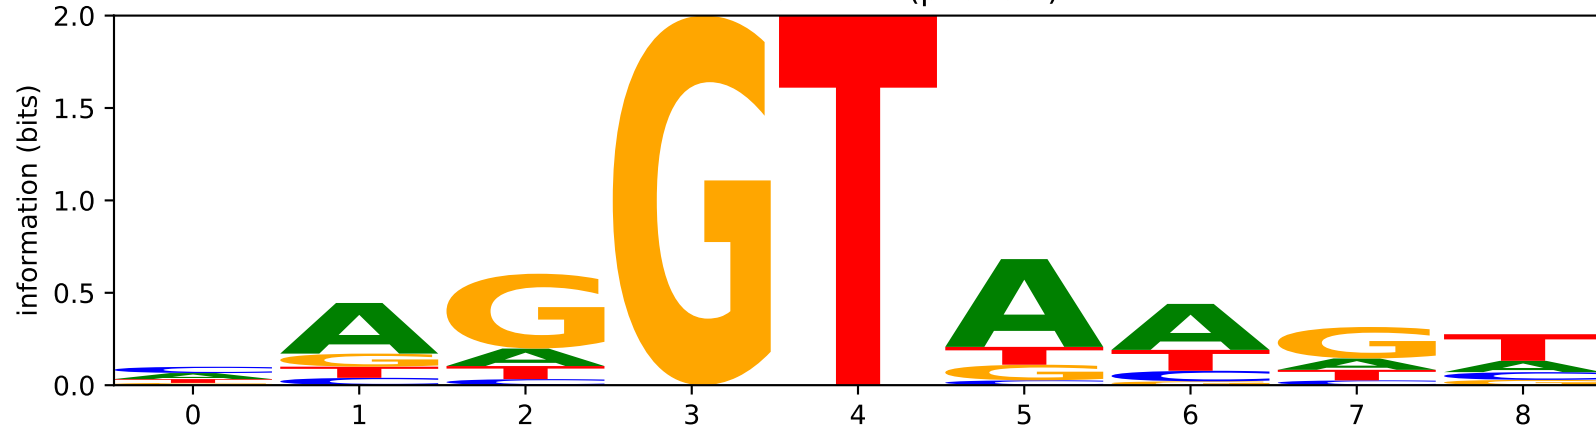

GT donor motif (phase 0)

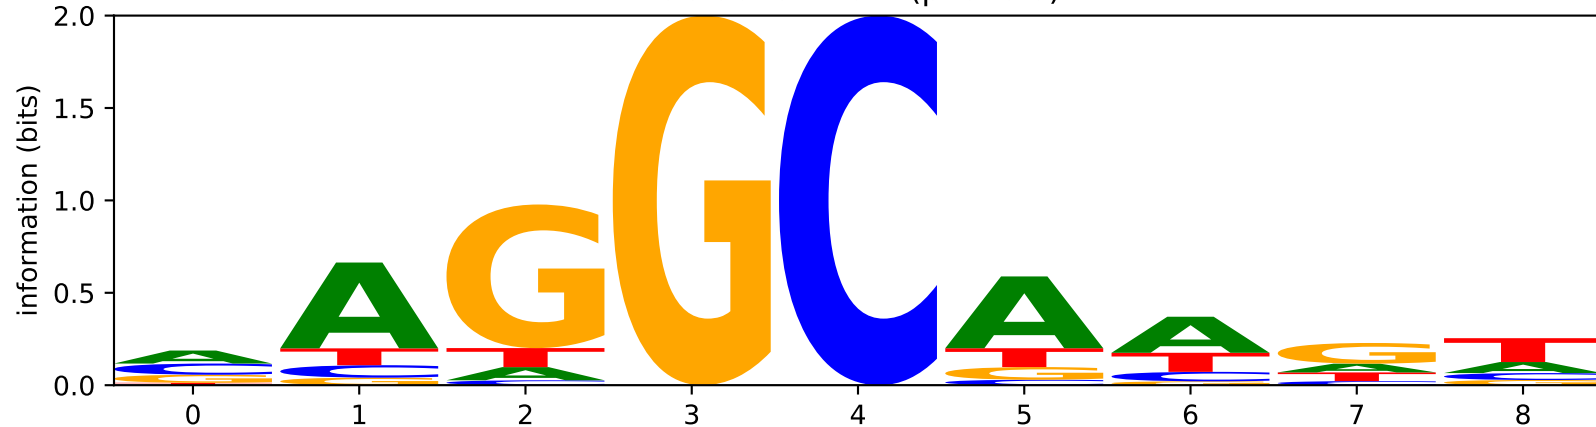

GT donor motif (phase 1)

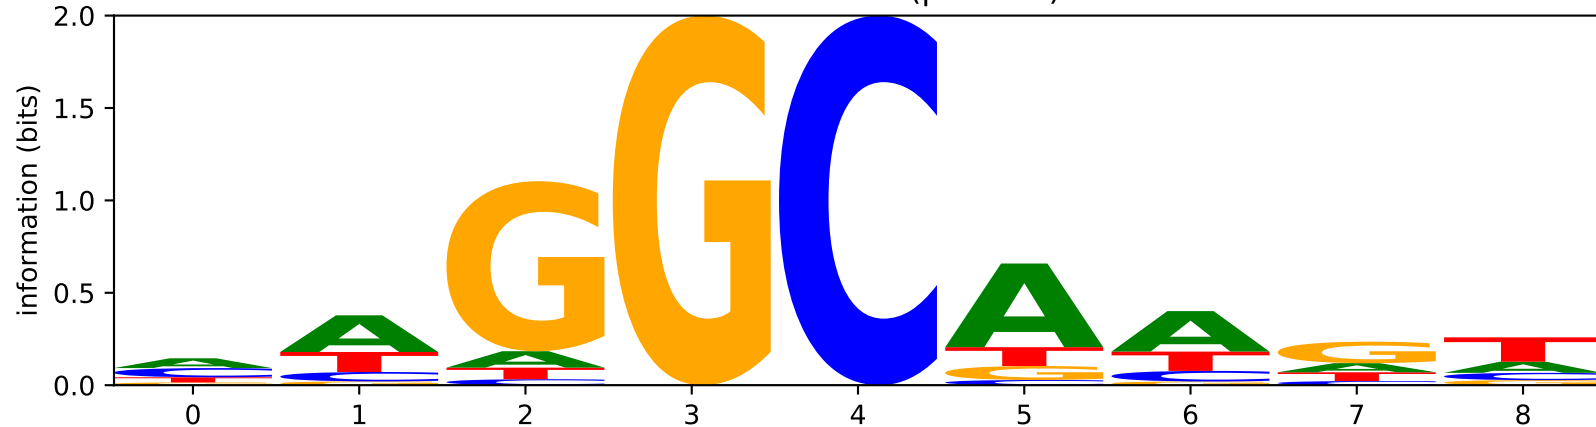

GT donor motif (phase 2)

GC donor motif (phase 0)

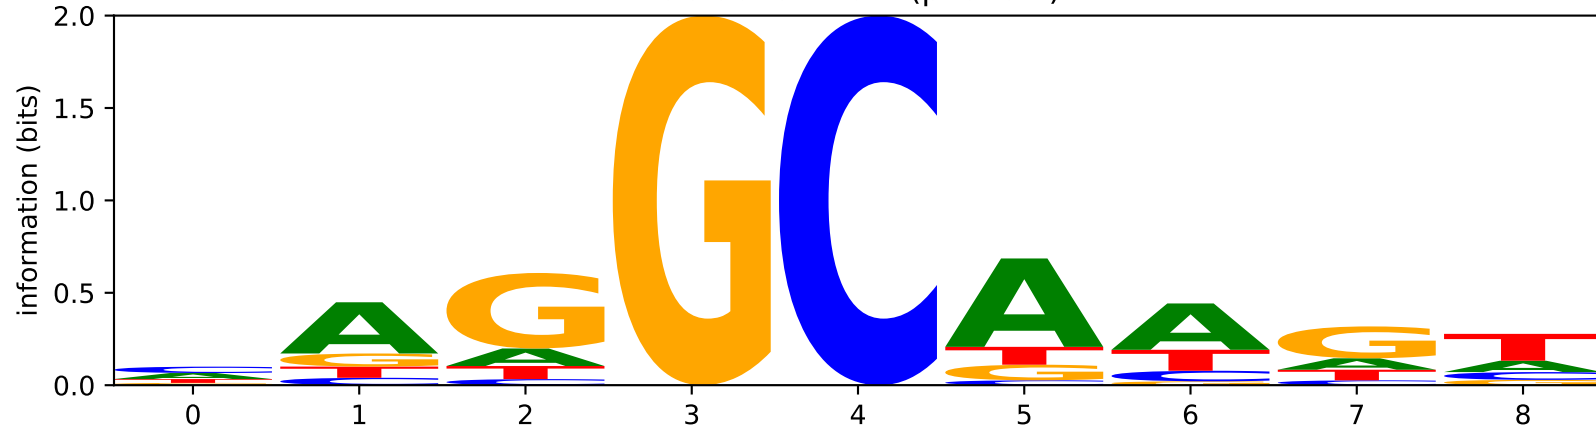

GC donor motif (phase 1)

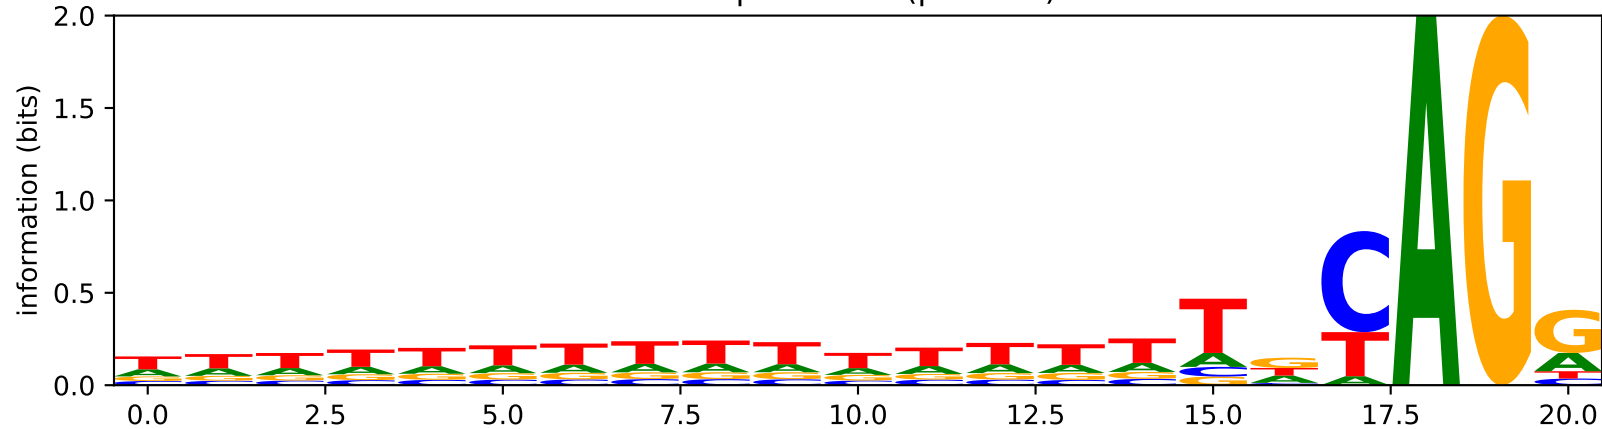

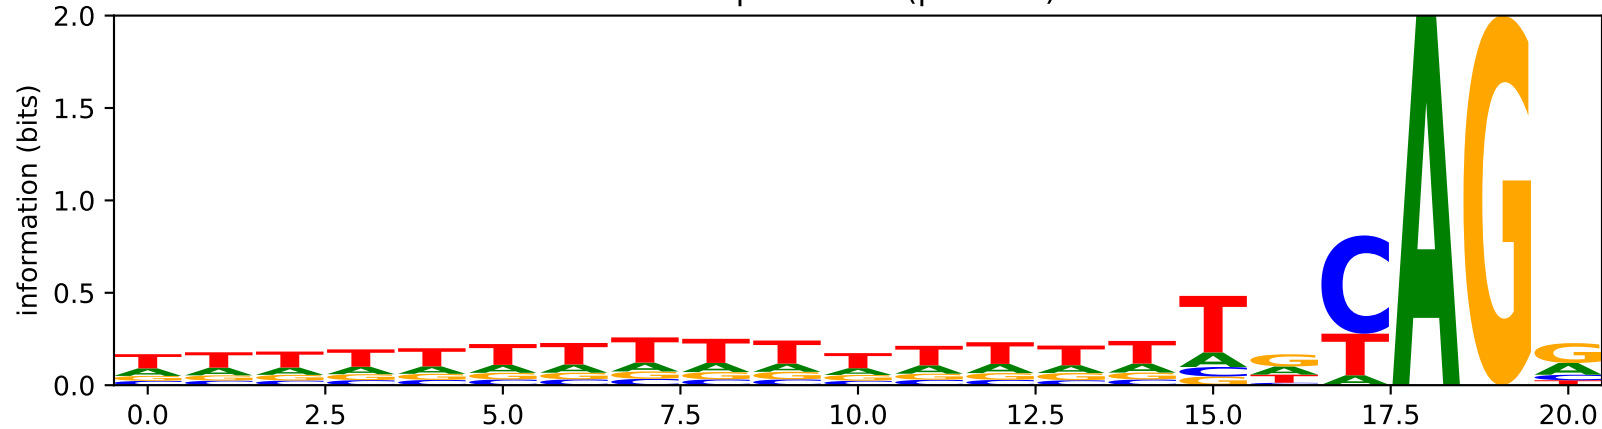

GC donor motif (phase 2)

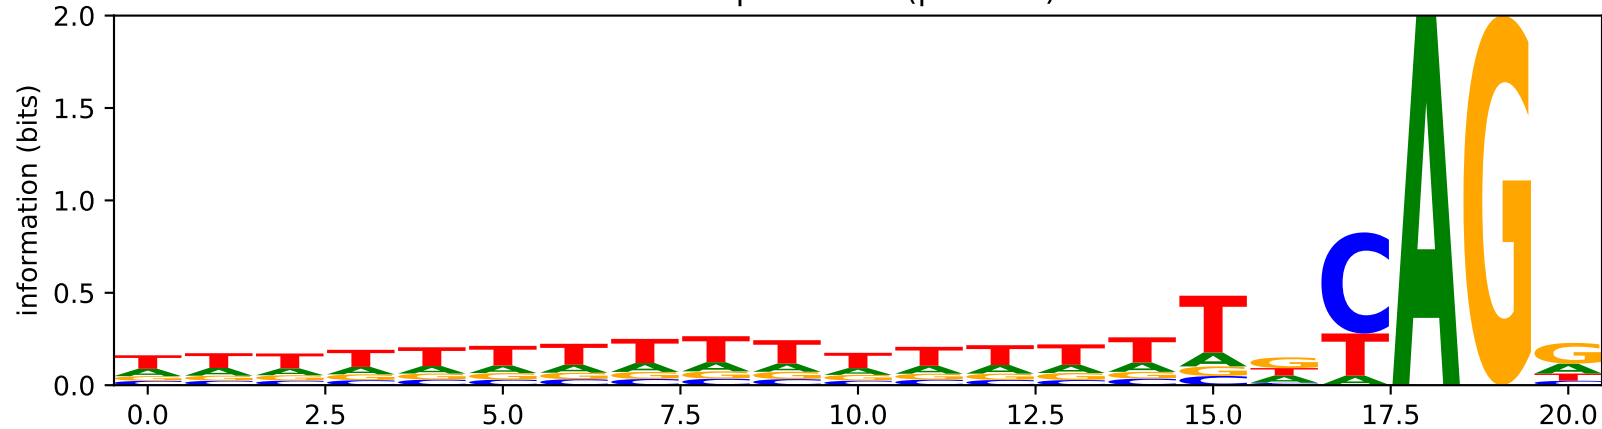

Acceptor motif (phase 0)

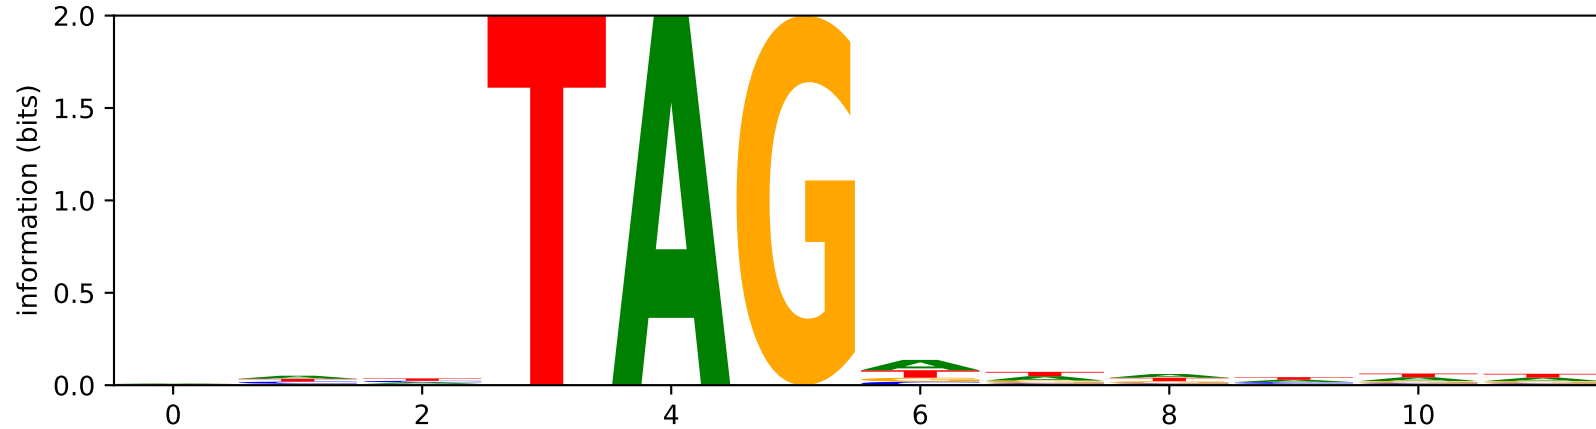

Acceptor motif (phase 1)

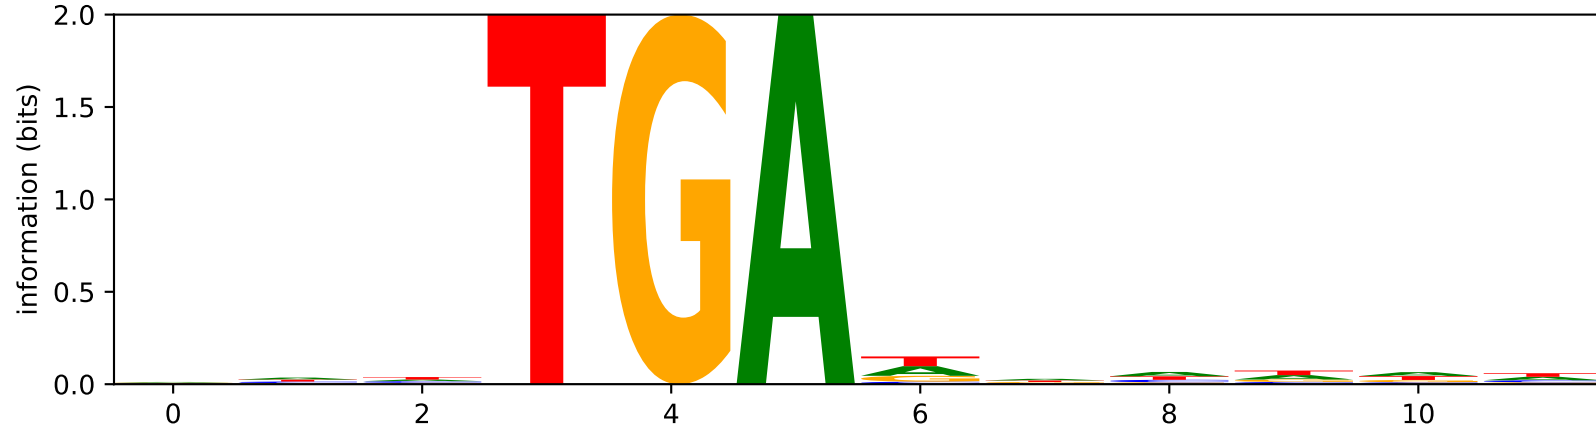

Acceptor motif (phase 2)

Amber motif

Umber motif

Ochre motif
